

 Day 3/14 —

HTML Links & Images: Web Pages ko Connect aur Sundar Banana

Aaj hum seekhenge kaise HTML me links banate hain aur images add karte hain, jisse aap apne webpages ko connected aur visually attractive bana sako.

Links kya hain?

Links banane ke liye `<a>` (anchor) tag use hota hai.

`href` attribute me link ka URL diya jata hai.

Do tarah ke links hote hain:

- 1 External Links** – kisi aur website ka link 
- 2 Internal Links** – apne website ke dusre page ka link 

Example:

```
<a href="https://www.google.com" target="_blank">Google Visit  
Karein</a>
```

`target="_blank"` → link naya tab me open hota hai.

Images kya hain?

- Image dikhane ke liye `` tag use hota hai.
- **src** attribute me image ka path hota hai.
- **alt** attribute SEO aur accessibility ke liye important hai.

Example:

```

```

E Example Code:

```
<!DOCTYPE html>

<html>

    <head>
        <title>Links & Images Example</title>
    </head>

    <body>
        <h1>Day 3: Links & Images</h1>

        <h2>External Link</h2>
        <a href="https://www.google.com" target="_blank">Google</a>
        <h2>Internal Link</h2>
        <a href="about.html">About Page</a>

        <h2>Image Example</h2>
        
    </body>

</html>
```

...Output...

Day 3: Links & Images

External Link

Internal Link

[About Page](#)

Image Example

Aaj ka Task (5 min)

-  1 Upar ka code apne editor me likho ya copy-paste karo.
 -  2 Ek link add karo jo aapke LinkedIn profile pe le jaye 
 -  3 Ek image add karo apne computer se 
 -  4 File ka naam **day3.html** rakh kar browser me open karo 
-

Bonus Tip:

Links me descriptive text use karo (e.g., “Click Here”  → “My Portfolio Dekho” 

Images ka size optimize rakho taaki page fast load ho
