

 Day 10/14 –
Embedding Multimedia
(Audio/Video): Web Pages Ko
Interactive Banao   

Aaj hum seekhenge ki HTML me audio aur video kaise embed karte hain, taaki hum apne webpage me music 🎵, podcasts 🎙, ya videos 🎥 add kar sakein.

Multimedia Embedding kya hota hai?

Multimedia ka matlab hai audio (🔊 sound) aur video (🎥 visual media). HTML me inhe embed karne ke liye built-in tags hote hain.

Important Tags:

- 🎧 <audio> → Audio file play karne ke liye
- 🎥 <video> → Video file play karne ke liye
- 🎛️ controls → Play, pause, volume buttons dikhata hai
- ▶️ autoplay → Page load hote hi play ho jata hai
- 🔁 loop → Media repeat hota hai
- 🔇 muted → Media mute start hota hai

Example Code:

```
<!DOCTYPE html>

<html>
  <head>
    <title>Embedding Multimedia</title>
  </head>
  <body>
    <h1>HTML Audio & Video Demo</h1>

    <h2>Audio Example</h2>
    <audio controls>
      <source src="music.mp3" type="audio/mpeg">
      Your browser does not support the audio element.
    </audio>

    <h2>Video Example</h2>
    <video width="400" controls>
      <source src="sample-video.mp4" type="video/mp4">
      Your browser does not support the video tag.
    </video>
  </body>
</html>
```

Video Example

 **Aaj ka task (5 min):**

- 📝 Upar ka code copy-paste karke **day10.html** me save karo
- 🎵 Apne pasand ka koi MP3 ya 🎥 MP4 file add karo
- 📸 Browser me open karke screenshot lo aur LinkedIn par share karo

 **Bonus Tip:**

- 📡 Large media files ke liye streaming services (YouTube, SoundCloud) embed karna better hota hai
- 🖼️ poster attribute video me thumbnail set karne ke liye use hota hai
